Our Shooting Approach

We follow a storytelling style approach that focuses on real emotions, natural moments and ritual depth.

Our photography captures genuine expressions and family reactions with clean and timeless framing.

Our wedding films are crafted in documentary and cinematic formats, preserving real audio, emotional continuity and elegant visual storytelling.

All deliverables are provided in high-resolution and 4K quality with professional color grading and sound design.

Kindly Note

We truly look forward to being part of your special celebration.

To ensure everything goes smoothly, we kindly request your support on the following:

- For complete RAW and edited footage handover, we kindly request you to provide two new external hard disks.

This is purely for safety purposes. Since electronic devices can sometimes fail unexpectedly, we prefer maintaining a backup copy to ensure your wedding memories remain completely secure.

Your wedding emotions and once-in-a-lifetime moments are priceless, and we believe taking this extra precaution is the best way to protect them for years to come.

All data will be carefully transferred and handed over safely to you.

- To confirm the booking and block our team's dates, a 20% advance of the total budget is required. This helps us dedicate our complete availability exclusively for your event.
- After the pre-wedding shoot, 20% of the remaining payment will be cleared.
- Another 40% will be paid after the completion of all events.
- The final 20% will be paid after album and video delivery.

-- Travel and food arrangements for our team during the Pre-Wedding shoot will be taken care of by the client.

- For wedding and other events, accommodation arrangements will be taken care of by the client.

Our goal is to deliver your memories with care, clarity and commitment.

We appreciate your understanding and cooperation in making this journey smooth and memorable for both of us.

With gratitude,

Team
